

macmon secure announces its first UK Gold Partner

Network Access Control expert macmon secure has revealed Landscape Networks as its first UK Gold partner since launching its UK proposition.

Berlin, 06.03.2018 – Founded in 2003 in Berlin, Germany, macmon secure has been working closely with West Yorkshire-based Landscape Networks. The partnership has been very successful, with Landscape Networks achieving macmon's highest channel partner standard.

macmon secure develops network security software, focussing on Network Access Control (NAC). The company has grown from strength to strength, becoming a technology leader in the field of NAC. In 2014 macmon expanded its presence into the European Market, opening an office in the UK, enjoying growth of more than 25% year on year, working with customers from medium sized enterprises through to large international corporations in a range of sectors including industry, healthcare, Public Sector and financial services.

Rob Billington, Country Manager, macmon secure: "We are pleased to announce Landscape Networks as our first Gold Partner in the UK. We look for partners who have the capability to work closely with us to ensure that we are meeting the standards of technical excellence our clients expect. Landscape have successfully hit the revenue and training targets necessary to achieve the gold standard and we look forward to continuing to develop what is already a strong relationship with them."

Landscape Networks, which is a division of IT and Telecoms company Communicate Technology PLC, provides information security, data protection solutions and managed services supporting a range of businesses including law enforcement and government agencies.

Paul Dick, Director of Landscape Networks said: "We are thrilled to have achieved the status of Gold Partner with macmon and even prouder still that we are the first in the UK to receive this accolade. This is testament to our expert team who always go the extra mile to ensure they have the knowledge and training to provide our clients with the right solutions.

Paul continues: "We are looking forward to continuing our work with Rob and his team at macmon, to make sure businesses continue to be protected against the ever increasing threat landscape and security challenges."

About macmon:

The company is manufacturer of an independent and modular NAC solution who protects the network against unauthorised and unsecured devices, as well as internal attacks. Customers benefit from macmon's security know-how, predictable costs and an increased level of security, gained from determining exactly which devices are allowed on which segments of a network. The software features ease of use, integration with other leading security products, and ongoing development to keep it in line with the latest standards. The customer base includes international companies of various branches and sizes.

The headquarters of macmon secure GmbH are located in Berlin, Germany.

macmon secure is a member of the Trusted Computing Group and actively participates in various research projects.
