

## macmon secure successful at the VolkswagenStiftung

Berlin, August 7<sup>th</sup>, 2018: In terms of Network Access Control, the Volkswagen Foundation is counting on "Made in Germany!" in the future. The German IT security expert macmon secure achieved another major success by implementing its market-leading NAC solution with this renowned customer. The introduction of the macmon NAC version 5.3.0 will give the VolkswagenStiftung more flexibility in maintaining its systems and fast access to qualified in-house support. Another criteria that secured the contract for macmon was the fact that the macmon products engineered in Germany do not permit "third party access", meeting the latest requirements for data protection guidelines, a significant difference compared to US solutions.

### Easy and fast implementation

The macmon NAC solution has replaced the previously used US product at the Volkswagen Foundation and was immediately well received by the employees: "It quickly became clear to the IT team that the new solution was less awkward to manage and is tailored to the individual needs of the Volkswagen Foundation."

"The new NAC solution automates nearly all of the manual IT administrators' administrative tasks, allowing them to focus on productive tasks while monitoring the network in the background. When an unknown device attempts to gain access, it is automatically moved to a separate quarantine VLAN and the IT team is notified of the incident so that action can be taken immediately. "

### About macmon:

The company is manufacturer of an independent and modular NAC solution who protects the network against unauthorised and unsecured devices, as well as internal attacks. Customers benefit from macmon's security know-how, predictable costs and an increased level of security, gained from determining exactly which devices are allowed on which segments of a network. The software features ease of use, integration with other leading security products, and ongoing development to keep it in line with the latest standards. The customer base includes international companies of various branches and sizes.

The headquarters of macmon secure GmbH are located in Berlin, Germany.

macmon secure is a member of the Trusted Computing Group and actively participates in various research projects.
